

Apple iPhone or iPad

During the app installation your device may ask for access to 'location services'. Allow and tap OK.

To download the ViewRanger App from the Apple App Store,

select '**Search**' bottom right. In the search box at the top, type '**viewranger**' and search for the App. (Pictured)

Click '**install**' to install the App. The **viewranger** Icon should appear

Launch it. You'll be asked to Sign Up using email, Google or Facebook Accounts. Follow this process by filling in **Name**, **Email Address** and a **Password**. You will be sent a confirmation by email.

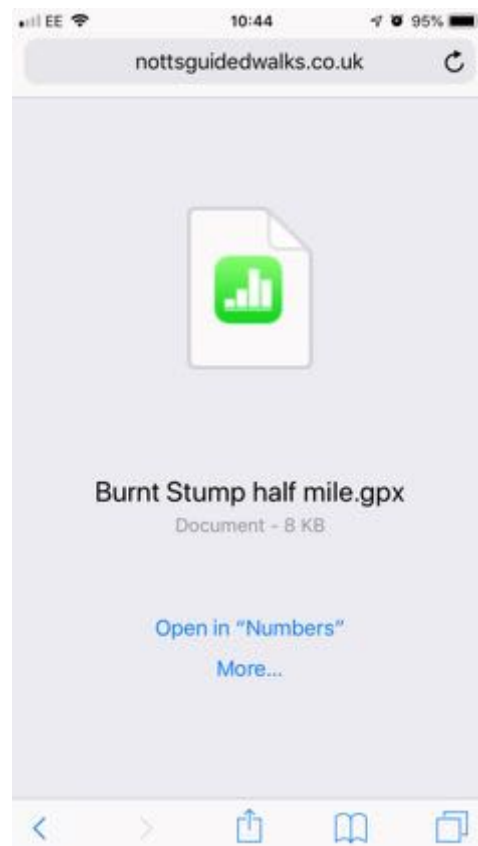

Exit Viewranger, launch your web browser, then navigate to www.nottsguidedwalks.co.uk/self-guided-walks/ and click on the desired walk.

Tap the green button to 'download the GPX' file (pictured)

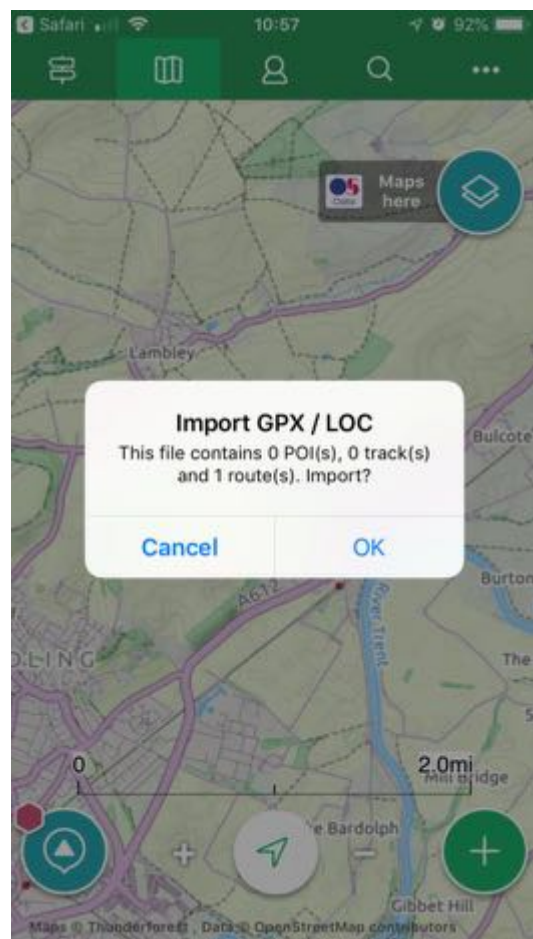

At this point your device will suggest opening the file in the Numbers App. Ignore this and tap the word **More..** underneath (pictured)

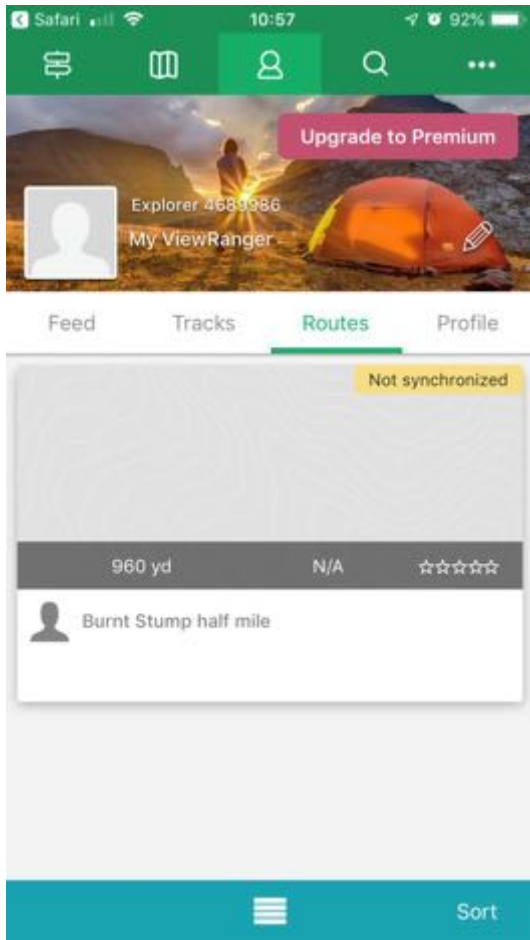

A menu will pop up. You must scroll horizontally the middle portion of the menu by swiping right to left. This will reveal the 'copy to ViewRanger' icon (pictured)

The following screen should appear as viewranger is launched. Respond by clicking **OK** to continue.

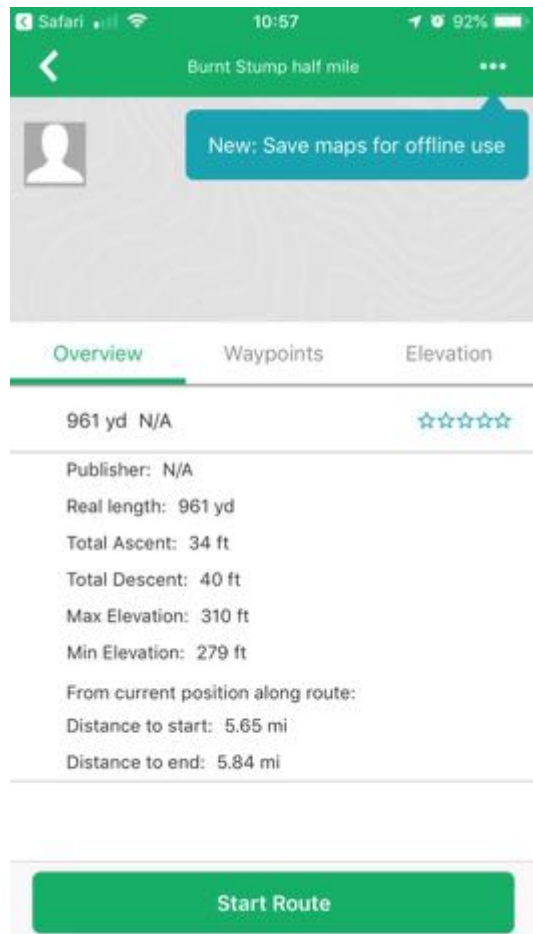

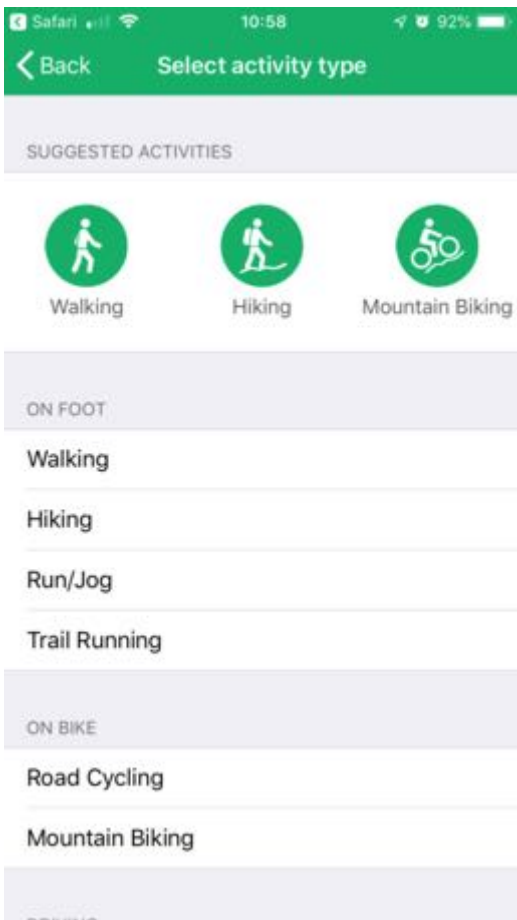

In the Viewranger App, tap the **'My Viewranger' icon** across the top of the screen and then tap **'Routes'** to show the downloaded route.

Then tap the route that appears (as pictured)

The next screen shows a breakdown of the selected route. If all looks OK, tap the green **'Start Route'** button to proceed to the next step.

You then select how you will travel the selected route. We assume it will be on foot, so tap the green '**Walking**' icon to proceed.

You should be up and walking at this point, as the app will show the map, your location and route / direction to follow.
